DETAILED ACTION

Drawings

1. The drawings are objected to because Figure 3A (iv) should be labeled to show FSTCLK switching to REFCLK. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

2. Claims 17-35 are allowed.
3. The following is an examiner's statement of reasons for allowance: Claims 17-21 and 29-30 are allowed because the closest prior art of record fails to disclose a circuit

as shown in Figures 5-6 wherein upon receipt of the switching signal (Bypass) the device will sense the first clock signal (REFCLK) and if the first clock signal (REFCLK) is at a second level (low) when the switching signal (Bypass) is received, the processor clock control device is operable to hold the clock signal output at the second level (low), and then sense the second clock signal (FSTCLK) and when the second clock signal (FSTCLK) transitions from a first level (high) to the second level (low) to output the second clock signal (FSTCLK) in combination with the rest of the limitations of the base claims and any intervening claims. These reasons for allowance are based on applicant's response filed on September 29, 2005, wherein applicant states that the switching signal is the synchronized switching signal (bypass) of Figure 3 (see applicant's remarks page 7, paragraph 3). Claims 22-28 and 31-35 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 9 wherein the device further comprises a further clock switching signal input operable to receive a further switching signal (LAUNCH) in combination with the rest of the limitations of the base claims and any intervening claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
